

# Jaspa Coffee Co. Website

**8<sup>th</sup> September 2024**

## **Introduction**

Welcome to our proposal for the new company website.

## **Purpose and objectives**

1. Showcase what we can offer to our customers
2. Provide an easy way to market and sell our products
3. Listen to feedback from customers to enhance our business and products

## **Statement**

We all love coffee. For many it is the fuel they need to get going in the morning and for others it is the midday pick-me-up to finish their workday. People love the smell of fresh ground and brewed coffee beans and this combination can invoke many great feelings and memories when experienced.

Jaspa Coffee Co. wants to help people who are rushing through their day to slow down and take a breath while they get a quick pick-me-up. Our products are tailored towards three customers; early risers, business professionals, and college students, including different coffees that are perfect for any time of day.

Our next step forward is designing and implementing a website to allow customers to view our products, order online, and contact us while providing a sense of the company's message. We plan to use simple but bold designs to attract the viewer to different sections of the website and emphasize listening to customer feedback to keep people loving our coffee and brand. We also plan to take advantage of seasonal items, specifically pumpkin in the fall and peppermint before the holidays.

All of this sounds hard to accomplish. To help put your worries to rest below are some milestones and plans to help us meet these goals.

---

## MILESTONES

### Seed Prototype

An initial website that includes the homepage and some design indicative of the company branding

### Root Prototype

The website's homepage is fully functional and contains the links to other pages on the website. The company's design palette is more visible for visitors and contains both colors and images to invoke a sense of calm.

### Trunk Prototype

The addition of several more working pages on the website, including contact and about us pages. Both with complete information added and linked back to the homepage.

### Branch Prototype

All proposed components and pages of the website are present and most are working correctly. Major surveys and user testing by unaffiliated users.

### Crown Prototype

The complete website containing all of its proposed features functional and meeting all requirements as described within the Gantt chart and timeline

### Deliverables

Each prototype will be a deliverable to showcase project progress.

A Gantt chart tracking project tasks, member contributions and individual tasks, and a timeline for each stage of the project.

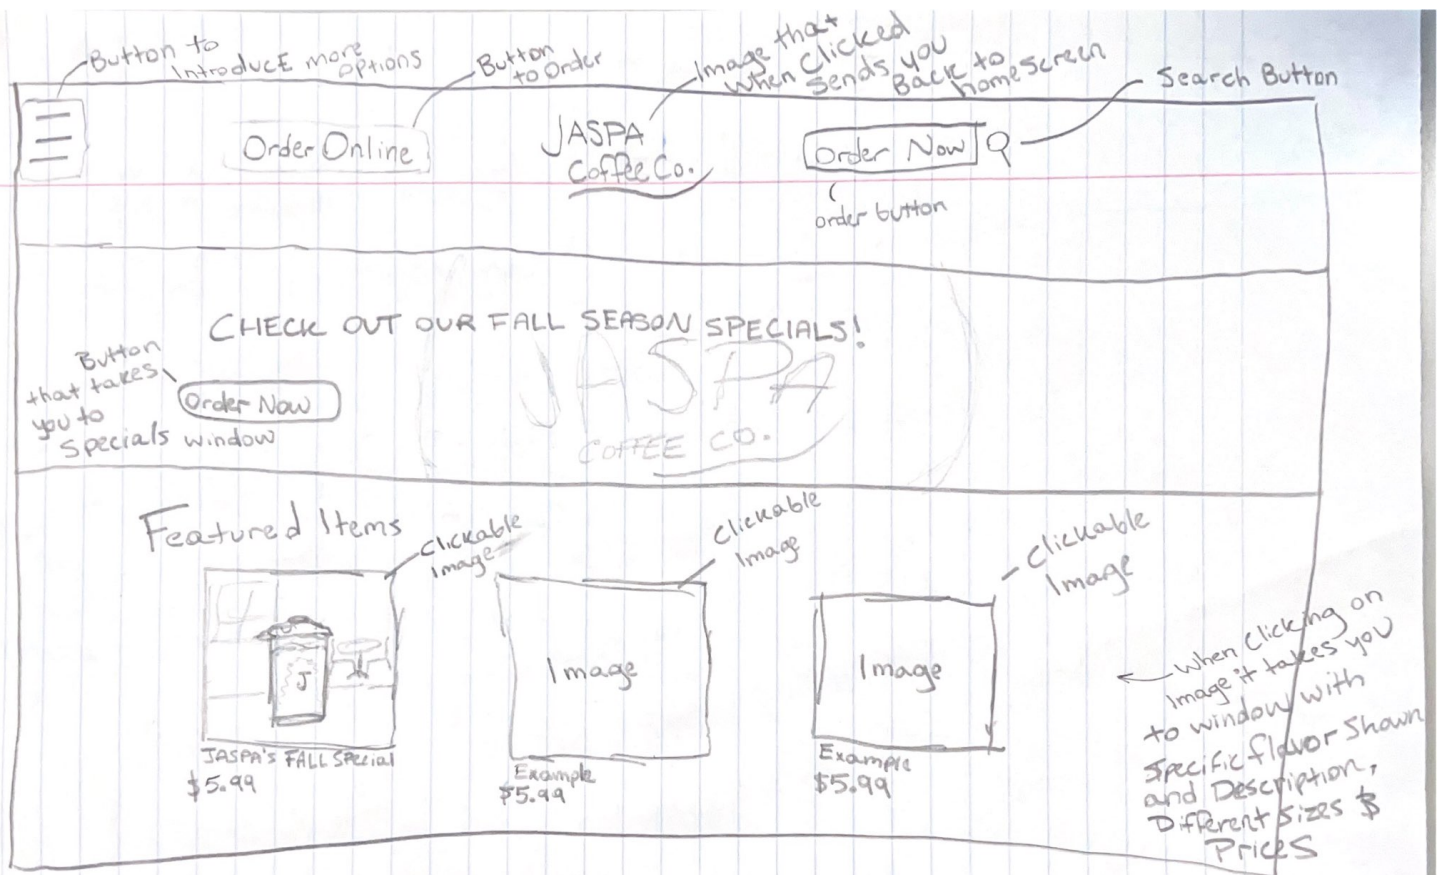

A Youtube video with commentary demonstrating the website and its working functions with each prototype.

A live demonstration with an executive (TA) will be arranged after the final prototype is complete to showcase the finished product.

## Features

1. Homepage
2. Contact page
3. About page
4. Product page
5. Menu page
6. Clickable items that lead to that items specific details page
7. Seasonal menu pages
8. Option selection sandwich icon (Click to open options menu)
9. Search button
10. Menu filtering for items
11. Images that invite users to click or interact with them
12. Feedback box
13. Terms of service button / page
14. Side navigation button and layout
15. Home button (Logo button)
16. Filters present on menu page
17. Specific item has multiples sizes/prices selectable
18. Description on each product page
19. Rotating image carousel on homepage
20. Seasonal designs

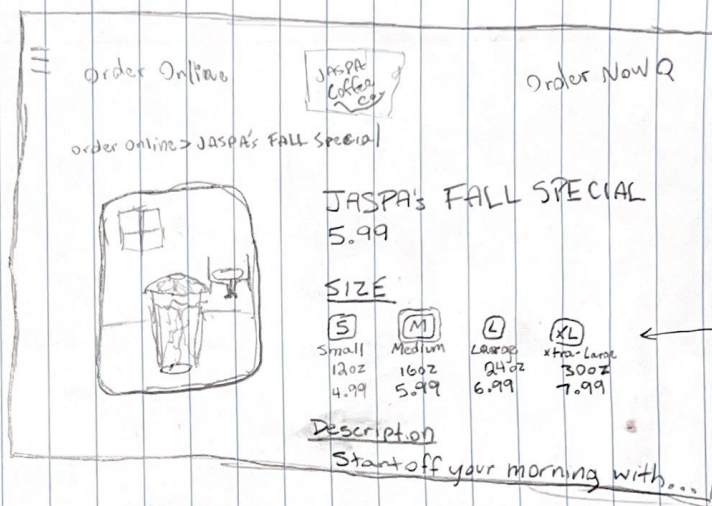

FRONT/MAIN PAGE

When Image  
is clicked →

opens up a window with that specific item and gives  
details on it and different sizes to choose from.

selectable  
sizes

Filters: Hot cold Drinks Food

Menu Page
